

NearStar ATOM

Enhanced Accountability
Tracking & Reporting

Key Benefits

- ◆ Powerful Search
- ◆ SLA Overview
- ◆ End-to-End Tracking
- ◆ Platform/Vendor Neutral
- ◆ Integrates with existing 3rd party finishing hardware
- ◆ LDAP Security Enabled

Tracking Functionality

- ◆ IMB Integration
- ◆ Real-Time Task Status Information
- ◆ Barcode scanner enabled
- ◆ Job Ticket / Work Order Modification & Reprint
- ◆ Task Modification

Reporting

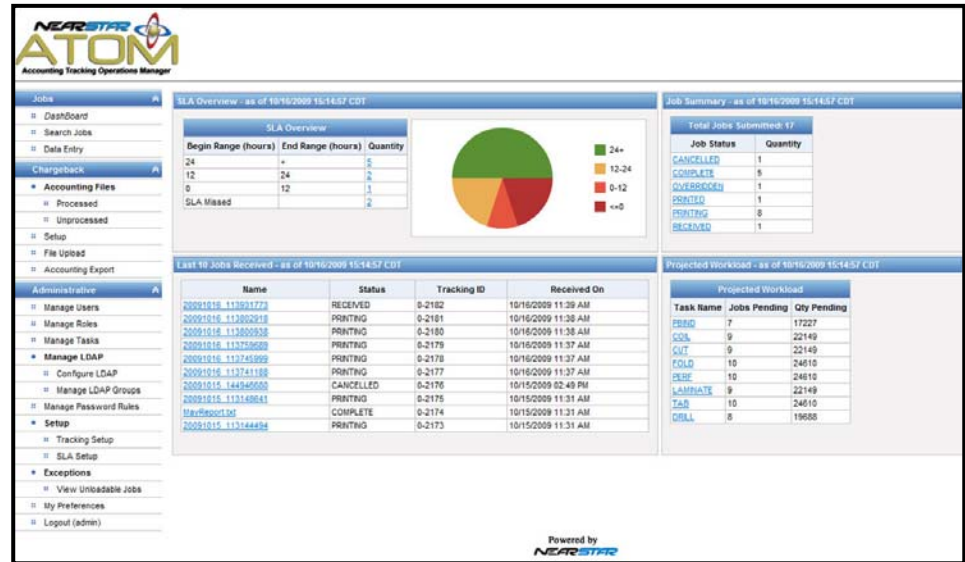

Module Functionality

- ◆ Custom Reporting
- ◆ Report Automation
- ◆ SLA Metrics
- ◆ Printer Statistics

Accounting

Module Functionality

- ◆ Automated Import/Export
- ◆ Enhanced Accounting Integration

The NearStar Accounting Tracking Operation Management (ATOM) system is a modular java-based platform that accumulates job accounting records, provides this data to be utilized for reporting, and allows the print enterprise to track the status of print jobs from receipt to completion.

Platform Dependent and Vendor Neutral

ATOM is well-suited to be used with Xerox printers, which have the Xerox XSIS XEAR product that provides enhanced job accounting information about printed jobs. This information is captured by ATOM for tracking and reporting.

Additionally, once the job has been printed a variety of third party finishing products, job ticket solutions and fulfillment applications may also be integrated into ATOM to enable monitoring by the operations staff for all incoming jobs and provide near real-time status throughout their production lifecycle.

If the post-print process has an API that can be accessed by ATOM, NearStar can provide professional services to integrate this information. If this is a manual process or an API is not available, then jobs can be tracked by scanning bar codes on a cover page or job piece as the job goes from one finishing station to the next.

The post-print finishing tasks that any given print job could go through are defined in the system so that as a barcode is scanned, that task is marked complete. When all the tasks associated with that job are complete, the job is marked complete.

The NearStar Advantage

- ◆ Provide both packaged and customized solutions
- ◆ Improved System Security and Auditing using latest cryptography technologies
- ◆ Allows the usage of new printers/hardware without changes in current applications and job flow
- ◆ Tailorable solutions that focus on solving 100% of the customer requirements (complete workflow solutions)
- ◆ NearStar products and services provides a customer with an extensible solution to meet future requirements
- ◆ World class 24x7 technical support and professional services organization

Job Search

Information about specific jobs can be each of these views to allow users to drill down to specific jobs. In addition, the search capability gives users a powerful tool to find specific jobs

Please contact Sales@NearStar.com to schedule a demo of ATOM. NearStar will be available to discuss your needs whether its as simple as providing you with an out-of-the box accounting solution or a customized end-to-end tracking, accounting and reporting suite.
